Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 9/22/03.

DETAILED ACTION

1. This is the first action on the merits. Claims 1-8 are pending.

Drawings

2. The drawings filed 11/18/04, are acceptable as formal.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 7 and 8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The limitation in claim 7 that the muzzle housing is secured without the need of screw threads is indefinite since it is not clear how this could be accomplished.

The step of allowing the motorcycle to idle is indefinite since the engine would be running the entire time. (i.e. there is no step of starting the engine and therefore it is assumed the engine is running the entire time).

Claim Rejections - 35 USC § 102

Art Unit: 3682

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1-, 4-8, as best understood, are rejected under 35 U.S.C. 102(e) as being anticipated by Waelput (2006/0032709)

Waelput shows the claimed invention where an adapter (46) is secured to and engine oil filter without screw threads, a pump (34) pumps oil into the engine (12) via the oil filter port, the oil flowing from a reservoir (32), the oil is drained from the oil pan drain port (44) into a reservoir (36); if the engine is kept full of oil, then it appears the engine would be safe to operate during this process.

Claim Rejections - 35 USC § 103

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Waelput (2006/0032709).

Waelput shows the claimed invention as set forth above, but Waelput uses the oil changing device on a automobile engine. No mention is made of a motorcycle.

Art Unit: 3682

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use the device of Waelput on a motorcycle with any type engine, or any type of engine, since the oil needs to be changed in every engine from time to time.

Conclusion

9. The following are suggested formats for either a Certificate of Mailing or Certificate of Transmission under 37 CFR 1.8(a). The certification may be included with all correspondence concerning this application or proceeding to establish a date of mailing or transmission under 37 CFR 1.8(a). Proper use of this procedure will result in such communication being considered as timely if the established date is within the required period for reply. The Certificate should be signed by the individual actually depositing or transmitting the correspondence or by an individual who, upon information and belief, expects the correspondence to be mailed or transmitted in the normal course of business by another no later than the date indicated.
